

Seal & Peel

A hermetic seal that is easy to open

ALKOflex™

The one-piece induction heat sealing liner has various specifications to satisfy your packaging requirements.

The filling content is hermetically sealed and remains factory fresh after sealing. ALKOflex™ comes as either an easy peel format or a true weld version, both formats ensure the best operating window with different sealing layers.

ALKOflex™ can be used for many applications within the food and beverage industries, including fruit juices, sport drinks, dairy products, sauces, spreads, spices, vitamin products and much more.

ALKOflex™ can also be supplied with individual print images up to 6 colours. It is suitable for sealing on any plastic or glass containers.

Meyer Seals® offers you the optimal problem solving solution.
